The restaurant business is both an established field and also an evolving one. Today more people eat out, having less time to cook at home. With the advent of the celebrity chef, many people are interested in trying new and different foods. The expansive cable television networks provide entertainment in the form of reality shows revolving around winning money to open a dream restaurant or be top chef. The globalization of food distribution allows people everywhere to become familiar with ingredients never before available, stimulating their interest in food. As more than sustenance, dining out becomes entertainment as well as filling the need for nourishment. With over 80 combined years of cooking experience, Meyer and Vann have seen the trials of opening and running restaurants that they have worked in and those they have designed and helped to open. They bring this expertise to how to open and operate a restaurant and will take the reader through all the aspects of opening and running a restaurant, including many examples of pitfalls to avoid, rules to follow, and guidelines for success.

The development of the world economy indicates the growth of its integration and integrity through the deepening of specialization and cooperation of countries and business entities. Integration appears as an inevitable, objectively determined process that covers most spheres of economic life in the world and takes place according to its own laws, general principles, and goals, taking into account the various grounds, conditions, and levels of such integration. Today we can observe two mutually exclusive features of integration processes: globalization of the world economy and simultaneous national protectionism, which has gained considerable influence in the last decade. We are observing on the one hand the strengthening of integration processes in the world economy in all spheres of social life; there is a reassessment of the system of risks for the modern state and most importantly, we are witnessing an increasing pragmatism of relations between countries, the basis of which is dominated by economic factors. At the same time, significant changes are taking place in the field of hospitality and tourism. The diversification of hospitality and tourism services, the development of the hospitality and tourism industry in new territories, and competition in the market require the governments of different countries to reconsider their attitude to the development of this industry and to approach the development of its strategy more seriously. In modern conditions, the governments of many countries pay more attention to the formation of strategies for the development of regions, including strategies for the development of the hospitality and tourism industry, considering the fact that the field of hospitality has changed significantly in recent years and continues to change. We have seen modern trends in the field of tourism and the hospitality industry, which are definitely relevant. The strategy for the development of the hospitality sector should harmoniously complement the socio-economic strategy of the country and combine the solution of priority socio-economic tasks, increasing the scientific, technical, and innovative potential, increasing investment attractiveness, and economic stability, improving the quality of life of residents. It should be noted that the first sector of the world economy affected by the global pandemic of COVID-19 is tourism. In the current conditions of the global pandemic, it is obvious that tourism is losing employees and customers due to the impossibility of flights to different countries and the risk of contracting the disease from COVID-19. Nevertheless, even in this situation, you can find a way out to
