non è vero che la matematica suscita sempre poco interesse questa almeno è l'impressione che si ricava quando lo spunto per parlarne viene non solo dalla scienza e dalla tecnologia ma anche dall'arte dalla letteratura dal cinema e dal teatro ce lo ha insegnato Michele Emmer con i suoi convegni matematica e cultura e lo abbiamo sperimentato a Bologna con le iniziative del 2000 per l'anno mondiale della matematica e per Bologna città europea della cultura d'altra parte negli ultimi anni abbiamo finalmente visto sullo schermo come protagonisti di film di successo dei matematici non rappresentati come individui strani ma come professionisti che svolgono il proprio lavoro non necessariamente di insegnanti anche alcune opere teatrali di risonanza internazionale hanno parlato di matematici e questo ci ha spinto a organizzare per la prima volta in Italia a Bologna la rassegna matematica e teatro che ha dato occasione non solo di assistere a spettacoli molto piacevoli ma anche di parlare dei rapporti tra scienza matematica e potere al tempo di Napoleone di numeri primi di teoria di Galois questo volume che documenta le attività realizzate a Bologna nel 2004 nell'ambito del progetto europeo Mathematics in Europe è rivolto a tutti coloro che hanno curiosità per la matematica ma anche per il teatro il cinema la letteratura la scienza

ICMI or IMUK was founded in 1908 and initiated the establishment of national subcommissions to launch national activities in response to the IMUK agenda and to promote the reform proposals within each member country while ICMI's activities were thoroughly studied the activities of the national subcommissions are studied only very marginally in the meantime their work has been of major importance both because of their role in exploring and documenting the development of mathematics education at the beginning of the 20th century and because of the changes and new ideas which they brought to their countries importantly even if some results of their activities were analyzed

within their countries in the corresponding languages almost nothing is known internationally this book is planned to deepen our knowledge on at least some of the national subcommissions the book will interest both researchers and others interested in mathematics education and its development

this book seeks to explore the history of descriptive geometry in relation to its circulation in the 19th century which had been favoured by the transfers of the model of the  $\square$ cole polytechnique to other countries the book also covers the diffusion of its teaching from higher instruction to technical and secondary teaching in relation to that there is analysis of the role of the institution similar but definitely not identical in the different countries in the field under consideration the book contains chapters focused on different countries areas and institutions written by specialists of the history of the field insights on descriptive geometry are provided in the context of the mathematical aspect the aspect of teaching in particular to non mathematicians and the institutions themselves

questo volume rappresenta una prima parte del lavoro di ricerca che ha consentito di mettere a fuoco le vicende relative alle attivit  di programmazione e di progettazione per la realizzazione della nuova citt  universitaria e delle nuove sedi esterne di scuole o istituti universitari a questo volume seguir  una seconda parte che affronter  diversi temi di ricerca riguardanti la realizzazione della citt  universitaria e esempio la vicenda del progetto e della realizzazione del nuovo organismo universitario della citt  piacentiniana il progetto e la realizzazione del sistema del verde lo studio degli edifici costruiti dentro la citt  universitaria e successivamente demoliti
