statistical models attempt to describe and quantify relationships between variables in the models presented in this chapter there is a response variable sometimes called dependent variable and at least one predictor variable sometimes called independent or

explanatory variable when investigating a possible cause and effect type of relationship the response variable is the putative effect and the predictors are the hypothesized causes typically there is a main predictor variable of interest other predictors in the model are called covariates unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry bock velleman de veaux 2009 a p value p measures the statistical significance of the observed relationship given the model p is the probability that a relationship is seen by mere chance the smaller the p value the more confident we can be that the pattern seen in the data is not random in the type of models examined here the r measures the proportion of the variation in the response variable that is explained by the predictors specified in the model if r is close to 1 then almost all the variation in the response variable has been explained this measure is also known as the multiple correlation coefficient statistical studies can be grouped into two types experimental and observational

published annually since 1985 the handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic the handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community the series is fortunate to have attracted annual contributions from distinguished scholars throughout the world

the fourth edition of the guide to higher education in africa contains reliable and up to the minute information on higher education throughout africa over 900 institutions in 47 countries plus details of national education systems and agencies in a single reference source

many countries now employ national evaluation systems to demonstrate publicly that universities provide a quality education however the current processes of quality evaluation are often detached from the practices of teaching and learning in particular those who teach and those who learn still have to be won over to such audit processes this book argues that it is time for the higher

education sector to concern itself with the human dimension so as to develop both academic professionalism and students commitment to their learning based on five completed research projects which explore academics and students experiences and their views of quality evaluation the book argues that developing the intrinsic values of teaching and learning held by academics and students is key to achieving high quality education in this book the author critically reviews the four most frequently used terms related to current quality evaluation fitness for purpose value for money student satisfaction and students as customers and argues for a motivationally intelligent quality approach emphasising the moral dimension and the intrinsic values of academics and students the author also outlines an improved quality evaluation system that encourages and increases academics and students commitment to teaching and learning

this book explores student education transition and employability negotiation experiences in various contexts it explores determinants of student transitions at three levels including macro meso and micro but focuses on exploring affordances constraints and strategies at the micro level the framework underpinning the explorations at the micro level covers a range of different forms of capital including human culture social identity psychological and agentic the book is unique in three ways first it consists of chapters about critical discussion empirical research and practical guidance about student transition experiences the critical discussion and empirical research chapters explore and obtain insights about the complexity of student transitions and develop conceptual frameworks that guide the development of applicable practices the book is therefore a useful resource for policy makers institutions academics professionals and students second it provides insights about how student transitions are determined by a range of factors at different levels these insights extend discussions about student transitions in the current literature which have mainly explored impacts of policies institutional programmes and human capital finally it is international in focus because it draws on research with different cohorts of students and graduates in different contexts insights provided in the book are therefore rich diverse and comparative
