harold pinter made his dramatic début in 1958 with the birthday party a piece which was received with almost total incomprehension by critics and public alike but time has shown that this reaction was due to the unfamiliarity of his dramatic style rather than to inherent obscurities in his work and the caretaker

produced two years later quickly earned the cinema the radio and television during the past decade he has established himself as the most consistently successful serious dramatist of his generation this study traces the development of pinter s writing from the so called comedy of menace exemplified by the birthday party in which the mood alternates between the jocular and the terrifying with the humour matching the horror to the later pieces such as the homecoming 1965 and old times 1971 which explore the questions of personal identity and of the verification of experience how do we reconcile the inconsistencies between the present and the past or how much of what a character says of himself are we to believe the problem of communication is another central theme in pinter s work although this often turns out to be a matter of refusal rather than of inability as pinter has remarked himself communication is too alarming to disclose to others the poverty within us is too fearsome a possibility finally the author pays a special tribute to the excellence of pinter s dialogue and the compactness of his writing this he finds is not only a matter of the accuracy of pinter s ear in reproducing the vocabulary and rhythms of contemporary speech but of his power to arouse and control the sensibilities of his audience working through what is not said as much as through what is john russell taylor has been film critic of the times and writes on the theatre films and television for a number of journals he is now teaching in the university of southern california his books include the rise and fall of the well made play 1967 cinema eye cinema ear 1969 and anger and after a guide to the new british drama 1962
