in the literature of sustainable development many have argued for the encouragement of mixed farming involving the integration of livestock and crops on one farm to meet the needs of small scale african farming systems scoones and wolmer both with the environment group at the institute of development studies u of sussex argue that behind this argument is the implicit or explicit assumption that mixed farming represents a stage in a normative evolutionary process towards an ideal they suggest that this view is mistaken and that mixed farming is only one of a range of possible pathways of change in agricultural systems they present case studies from ethiopia mali and zimbabwe and analyze how social actors have varying access to resources this variance is often due to institutional arrangements that are too often ignored in discussions of mixed farming and therefore fail to take into account situations that could help development efforts to be more effectively targeted annotation copyrighted by book news inc portland or

Howard and Ill have given educators a stunning encyclopedic handbook on career pathways loaded with helpful lists and charts and written in a clear conversational tone. Career pathways is the new indispensable resource for superintendents, principals, counselors, and teachers. Elaine Johnson, Honorary Fellow, Huron College. Career pathways is the most comprehensive curriculum approach to achieving the dual goal of academic and career maturity. High school educators who seek to promote not just college admissions but college success should consider the career pathways approach. Kenneth Gray, Professor, Penn State University. Just imagine all students in your high school taking ownership of their own learning. This is exactly what happens in a student-centered pathways high school. Instructionally based, the collaborative career pathways approach is to help all students add relevancy to their school work by preparing for the future. Collaborative pathway high schools allow students to self-manage and problem-solve to better prepare for their future. This excellent resource brings together three crucial pillars: the classroom, the community, and the counseling processes that are found in all high schools. Students begin this process by learning about their aptitudes, skills, and interests and then selecting one of several broad career paths such as human services or science and industry. Students experience ongoing goal setting and decision making through the classroom, community, and counseling processes. Your students will be able to design and implement a plan that is just right for them. This is what student-centered learning is all about. Classroom processes remain the key to student-centered and self-directed learning. Integration occurs naturally as students have the opportunity to participate in integrated learning units that include the four core subject areas, technology, and one or two electives that all align to state and national standards and benchmarks. Community opportunities begin with guest speakers, chat partners, and field trip visits and then progress to job shadowing, internships, mentorships, and senior capstone projects. Counseling becomes a key component for students in the areas of academic, career, and social and personal skill development. Ample opportunities abound for role modeling and practice in teaming, problem solving, conflict resolution, character development, self-management, goal setting, and decision making by employing the career pathways model. Your school can add relevancy to what students learn and do during their high school years. Help students be more focused and team-oriented and the true drivers of their own learning.

Designed for providers who work with judicial clients, the Providers Guide presents effective cognitive-behavioral treatment approaches. The second edition of this bestseller unveils a state-of-the-art approach for effectively preventing criminal recidivism and substance abuse relapse within community-based and correctional settings. The core of the SSC program is a positive relationship between provider and client. Summary of results survey from the first edition of SSC 95 of the providers rated the components of SSC to be adequate to very adequate in meeting the treatment needs of judicial clients. Over 90% of providers rated clients as having a moderate to very high involvement in homework and reading. 95% of the clients rates as very high their satisfaction of SSC delivery, the provider's response to client needs, and clients' comfort with providers. Around 80% of clients reported their cognitive and behavioral control over AOD use and criminal conduct had improved during SSC. The accompanying participant's workbook to the SSC is written to engage clients and encourage active participation in treatment and responsible living. Phase I: Challenge to change, building knowledge and skills for responsible living. Phase II: Commitment to change, strengthening skills for self-improvement. Phase III: Taking ownership of change, lifestyle balance and healthy living.
