this volume is the outcome of collaborative european research among archaeologists archaeobotanists ethnographers historians and agronomists and frequently uses experiments in archaeology it aims to establish new

common ground for integrating different approaches and for viewing agriculture from the standpoint of the human actors involved each chapter provides an interdisciplinary overview of the skills used and the social context of the pursuit of agriculture highlighting examples of tools technologies and processes from land clearance to cereal processing and food preparation this is the second of three volumes in the earth monograph series the dynamics of non industrial agriculture 8 000 years of resilience and innovation which shows the great variety of agricultural practices in human terms in their social political cultural and legal contexts

from about 5500 cal bc to soon after 5000 cal bc the lifeways of the first farmers of central europe the lbk culture linearbandkeramik are seen in distinctive practices of longhouse use settlement forms landscape choice subsistence material culture and mortuary rites within the five or more centuries of lbk existence a dynamic sequence of changes can be seen in for instance the expansion and increasing density of settlement progressive regionalisation in pottery decoration and at the end some signs of stress or even localised crisis although showing many features in common across its very broad distribution however the lbk phenomenon was not everywhere the same and there is a complicated mixture of uniformity and diversity this major study takes a strikingly large regional sample from northern hungary westwards along the danube to alsace in the upper rhine valley and addresses the question of the extent of diversity in the lifeways of developed and late lbk communities through a wide ranging study of diet lifetime mobility health and physical condition the presentation of the bodies of the deceased in mortuary ritual it uses an innovative combination of isotopic principally carbon nitrogen and strontium with some oxygen osteological and archaeological analysis to address difference and change across the lbk and to reflect on cultural change in general

people with animals emphasizes the interdependence of people and animals in society and contributors examine the variety of forms and time depth that these relations can take the types of relationship studied include the importance of manure to farming societies dogs as livestock guardians seasonality in pastoralist societies butchery symbolism and food examples are drawn from the pleistocene to the present day and from the altai mountains ethiopia iraq italy mongolia and north america the 11 papers work from the basis that animals are an integral part of society and that past society is the object of most archaeological inquiry discussion papers explore this topic and use the case studies presented in other contributions to suggest the importance of ethnozoarchaeology not just to archaeology but also to anthrozoology a further contribution to archaeological theory is made by an argument for the validity of ethnozoarchaeology derived models to neanderthals the book makes a compelling case for the importance of

human animal relations in the archaeological record and demonstrates why the information contained in this record is of significance to specialists in other disciplines

economic archaeology is the study of how past peoples exploited animals and plants using as evidence the remains of those animals and plants the animal side is usually termed zooarchaeology the plant side archaeobotany what distinguishes them from other studies of ancient animals and plants is that their ultimate aim is to find out about human behaviour the animal and plant remains are a means to this end the 33 papers present a wide array of topics covering many areas of archaeological interest aspects of method and theory animal bone identification human palaeopathology prehistoric animal utilisation in south america and the study of dog cemeteries are covered the long running controversy over the milking of animals and the use of dairy products by humans is discussed as is the ecological impact of hunting by farmers with studies from serbia and syria for britain coverage extends from mesolithic star carr via the origins of agriculture and the farmers of lismore fields through considerations of the neolithic and bronze age outside britain papers discuss neolithic subsistence in cyprus and croatia iron age society in spain medieval and post medieval animal utilisation in northern russia and the claimed finding of a modern red deer skeleton in egypt s eastern desert in exploring these themes this volume celebrates the life and work of tony legge zoo archaeologist and teacher
