Cyber Security Management: A Governance Risk and Compliance Framework by Peter Trim and Yang Im Lee has been written for a wide audience derived from research. It places security management in a holistic context and outlines how the strategic marketing approach can be used to underpin cyber security in partnership arrangements. Indeed, those with a limited knowledge of cyber security will be able to develop a comprehensive understanding of the subject and will be guided into devising and implementing relevant policy systems and procedures that make the organization better able to withstand the increasingly sophisticated forms of cyber attack.
