excerpt from diesel engine in practice the interest which has been aroused in this country over the diesel engine in the past few years is remarkable but not nearly so much so as the engine itself until four years ago there were but few builders of the diesel engine in america at the present time there are twenty or more manufacturers building different types of diesel

engines several of them adopting foreign designs between four hundred and five hundred plants in the united states are now being operated with engines of the diesel type ranging from one to as high as eighteen engines in a plant it has been the duty of one of the authors to visit most of these plants in the capacity of an instructor and in so doing he became acquainted with the men who are operating and also the knowledge they had of their work it is safe to state that not ten per cent of the operators of diesel engines know one quarter as much about their engines as the average steam engineer knows about his engine naturally there is a reason for this a steam engineer before he receives his license is generally compelled to fire a boiler for two or three years and sometimes longer then he receives a fireman s license and in two or three years more of firing the boiler if he can pass a certain examination he is eligible to a third class steam engineer s license they do all this work gladly to learn the business about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
