history of fishing

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1904 edition excerpt chap viii spinning for salmon let it be understood that by spinning i mean the rod and line are to be handled and the bait spun by the angler certainly a bait trailed behind a boat spins but i consider that style of fishing requires no special explanation and first we will consider spinning for salmon this method of capturing the fish is by no means so popular as fly fishing yet if it be pursued with suitable tackle and in a skilful manner the sport obtained and the mere act of fishing are not to be despised it will frequently happen that from a variety of reasons salmon will refuse a fly be it ever so skilfully presented to their notice yet they will not refuse a brilliant bait spun correctly over them another matter to note is that salmon often prefer an artificial spinning bait to a natural one what they take some of the artificial baits to be is a difficult matter to decide but without doubt such a bait as a phantom minnow or a spoon will often be taken when the natural bait is refused the rod should be of built cane or greenheart from eleven feet to twelve feet long it should be stiff yet discover some pliancy when in use it should have guard upright fixed rings and the top end ring also the bottom one next to the winch should have an inner lining of some hard metal this to prevent these two most important rings from becoming worn too easily the bottom ring next the winch should be at least two feet six inches from the latter this will help a lot in giving free action to the line when casting you may use a bamboo rod with greenheart top but i much prefer built cane or greenheart when spinning for salmon the extra strength is very useful when playing a fish with the introduction of the silex spinning

excerpt from handbook of angling teaching fly fishing trolling bottom fishing and salmon fishing with the natural history of rider fish and the best modes of catching them i have been for several years before the public as a periodical writer on piscatorial matters and during this period have received more communications than i can enumerate from correspondents in various parts of the empire urging me to write a plain sensible practical book on angling in general they have one and all complained that the majority of works extant upon angling treated only of one branch of the art and even in those works which embraced a greater variety of the subjects the treatment was so limited as to be unsatisfactory and incomplete they have insisted upon the necessity of a book that would teach as far as possible practically and fully fly fishing trolling and bottom fishing and they have also thought so favourably of me as to assert that they had full confidence in my ability to fill up the hiatus they lamented thus pressed to render a service to the angling world i have made the attempt in the following pages about the publisher forgotten books publishes hundreds of thousands of rare
