this state of knowledge review of information on relationships between wildland fire and nonnative invasive plants can assist fire managers and other land managers concerned with prevention detection and eradication or control of nonnative invasive plants the 16 chapters in this volume synthesize ecological and botanical principles regarding relationships between wildland fire and nonnative invasive plants identify the nonnative invasive species currently of greatest concern in major bioregions of the united states and describe emerging fire invasive issues in each bioregion and throughout the nation this volume can help increase understanding of plant invasions and fire and can be used in fire management and ecosystem based management planning the volume s first part summarizes fundamental concepts regarding fire effects on invasions by nonnative plants effects of plant invasions on fuels and fire regimes and use of fire to control plant invasions the second part identifies the nonnative invasive species of greatest concern and synthesizes information on the three topics covered in part one for nonnative invasives in seven major bioregions of the united states northeast southeast central interior west southwest coastal northwest coastal including alaska and hawaiian islands the third part analyzes knowledge gaps regarding fire and nonnative invasive plants synthesizes information on management questions nonfire fuel treatments

postfire rehabilitation and postfire monitoring summarizes key concepts described throughout the volume and discusses urgent management issues and research questions

this synthesis of post fire treatment effectiveness reviews the past decade of research monitoring and product development related to post fire hillslope emergency stabilization treatments including erosion barriers mulching chemical soil treatments and combinations of these treatments in the past ten years erosion barrier treatments contour felled logs and straw wattles have declined in use and are now rarely applied as a post fire hillslope treatment in contrast dry mulch treatments agricultural straw wood strands wood shreds etc have quickly gained acceptance as effective though somewhat expensive post fire hillslope stabilization treatments and are frequently recommended when values at risk warrant protection this change has been motivated by research that shows the proportion of exposed mineral soil or conversely the proportion of ground cover to be the primary treatment factor controlling post fire hillslope erosion erosion barrier treatments provide little ground cover and have been shown to be less effective than mulch especially during short duration high intensity rainfall events in addition innovative options for producing and applying mulch materials have adapted these materials for use on large burned areas that are inaccessible by road although longer term studies on mulch treatment effectiveness are on going early results and short term studies have shown that dry mulches can be highly effective in reducing post fire runoff and erosion hydromulches have been used after some fires but they have been less effective than dry mulches in stabilizing burned hillslopes and generally decompose or degrade within a year

this book outlines the foundations for understanding modern policing it is an essential introduction for all policing students and trainee police officers to the underpinning aspects of the profession providing a clear understanding of how the police service is currently organised and how it fits into the wider criminal justice system students are encouraged to think critically and reflect upon core concepts such as policing by consent police accountability

governance and professional standards and it examines the challenges of policing an increasingly global technical and diverse world the professional policing curriculum in practice is a new series of books that match the requirements of the new pre join policing qualifications the texts reflect modern policing are up to date and relevant and grounded in practice they reflect the challenges faced by new students linking theory to real life operational practice while addressing critical thinking and other academic skills needed for degree level study

the revised edition presents extends and updates a thorough analysis of the factors that cause and accelerate the aging of conductive and insulating materials of which transmission and distribution electrical apparatus is made new sections in the second edition summarize the issues of the aging reliability and safety of electrical apparatus as well as supporting equipment in the field of generating renewable energy solar wind tide and wave power when exposed to atmospheric corrosive gases and fluids contaminants high and low temperatures vibrations and other internal and external impacts these systems deteriorate eventually the ability of the apparatus to function properly is destroyed in the modern world of green energy the equipment providing clean electrical energy needs to be properly maintained in order to prevent premature failure the book s purpose is to help find the proper ways to slow down the aging of electrical apparatus improve its performance and extend the life of power generation transmission and distribution equipment
