the standard neoclassical approach to economic theorizing excludes by definition economic emergence and the related phenomenon of entrepreneurship we explore how the most economic of human behaviours entrepreneurship came to be largely excluded from mainstream economic theory in contrast we report that evolutionary economists have acknowledged the importance of understanding emergence and we explore the advances that have been made in this regard we go on to argue that evolutionary economics can make further progress by taking a more naturalistic approach to economic evolution this requires that economic analysis be fully embedded in complex economic system theory and that associated understandings as to how humans react to states of uncertainty be explicitly dealt with we argue that knowledge because of the existence of uncertainty is to a large degree conjectural and thus is closely linked to our emotional states our economic behaviour is also influenced by the reality that we and the systems that we create are dissipative structures thus we introduce the notions of energy gradients and knowledge gradients as essential concepts in understanding economic emergence and resultant economic growth

despite its current dominant status economic growth emerged as a field of study and as a political objective only after the second world war this book provides an alternative perspective to the anglo centric historical analysis of growth by turning the focus on finland and other nordic countries from the late 19th century until the second world war moreover it provides a conceptual history perspective to how economic growth can be examined before the emergence of economic growth as a concept this book places finland in the context of emerging nation states of the early 20th century europe and constructs five competing growth conceptions classical liberal agrarian conservative social liberal social democratic and communist with a

methodology derived from conceptual history this book presents a framework to study economic growth in the context of nationalism it showcases how ideas related to growth have not been synonymous with capitalism but rather they have been connected to state building and to comparison of economic systems the findings of the book highlight the interwar period as a key turning point in historical analysis of growth this book provides a fresh and a thought provoking account that will be of interest to students and scholars of economic history history of ideas development studies and degrowth and history of capitalism
