biochemistry is a science that is closely involved with many industrial fields especially those related to products for consumption or administration in living organisms such as animals and plants if we talk about the cannabis industry the importance and intervention of this science is much greater and more decisive knowing the chemical composition of cannabis is essential to establish the effects that its components can have on the organism from this knowledge we can deduce the therapeutic and recreational functions attributed to its consumption as well as its analgesic anti inflammatory anxiolytic and relaxing properties in order to achieve the harmonious coexistence of cannabis in products of various industries such as cosmetics pharmaceuticals and gastronomy it is crucial to know aspects such as the concentration of cannabinoids and which of these is predominant in the strain used since this largely defines the effect that the product will have on the user it is also necessary to know which strains contain high concentrations of other substances such as terpenes which directly influence the aromatic and taste characteristics of the plant and of the product in general cannabis itself is a plant that contains hundreds of substances with potential biological activity most of which have therapeutic effects these substances can be classified into groups the most important of which are cannabinoids terpenes and flavonoids in this text the most prominent substances that make up these groups are explored including their biological effects and the contributions they make to the plant and its characteristics in aspects such as flavor and aroma and the effects they have

on the organs and systems having understood the effects of cannabis and its derivatives on the organism the text then reviews the main methods for the extraction of cannabinoids and their proper preservation and maintenance so that this valuable product maintains its quality and effectiveness for years and even decades if you are interested in learning a little more about the inner side of the cannabis industry one of the most interesting approaches is the biochemistry involved with that in mind pharmacology university has prepared this audiobook with the intention of allowing you to learn more about the functions of cannabinoids and other groups of substances that have proven to have beneficial properties for health and well being as well as about the characteristics that laboratories must have and the strict regulations to which they are subjected in order to ensure that their products contain the highest possible quality we invite you to become part of a flourishing and booming medical cannabis industry through knowledge

evidence based practice an integrative approach to research administration and practice third edition focuses on how research based evidence drives scholarly practice

scientific essay from the year 2012 in the subject speech science linguistics grade excellent with honor course critical discourse analysis language english abstract the present paper has shown the practical part of cda according to three scholars namely they are norman fairclough ruth wodak and teun van dijk their approaches are somehow different in method and way of interpretation while fairclough is brought up on the systemic functional model of theory and thus often concentrates on rather limited amounts of research material wodak turns to sociolinguistics and ethnography with an emphasis on corpus based research and on work with different approaches with a variety of empirical data as well as background information however the notion that language is inherently social remains a key assumption in both approaches on the other hand similarly to fairclough van dijk acknowledges three different perspectives text discourse practice and

sociocultural practice and emphasizes on the link between textual analysis and sociocultural analysis however van dijk differentiates himself from both fairclough and wodak in his understanding of social events or of social institutions and power relations to van dijk social cognitions mediate between micro and macro levels of society between discourse and action between the individual and the group therefore the focus on social cognition governs the process of analysis
