this clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present unlike most studies which assume that the rise of the west is the story of the coming of the modern world this history drawing upon new scholarship on asia africa and the new world and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment

robert b marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime he explains its origins by emphasizing contingencies such as the conquest of the new world the broad comparability of the most advanced regions in china india and europe the reasons why england was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the united states emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the anthropocene once again arguing that the us rise to global hegemon was contingent not inevitable marks also points to the resurgence of asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years

how do historians make sense of the spatial layeredness of the past cyrus schayegh argues that the modern world s ultimate socio spatial feature is not the oft studied processes of globalization or state formation or urbanization but rather the fast paced mutually transformative intertwinements of cities regions states and global circuits

scale conflict in the years since the turn of the millennium delves into the narrative of inequality a story that has shaped and been shaped by the events of the last hundred years part of the blackwell history of the world series the goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world it will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time the volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change each provides a systematic account of a very large subject but they are also both imaginative and interpretative the series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production

it is no longer news that the western world is in a crisis a crisis that has spread far beyond its point of origin and become global in nature in 1927 ren gu non responded to this crisis with the closest thing he ever wrote to a manifesto and call to action the crisis of the modern world was his most direct and complete application of traditional metaphysical principles particularly that of the age of darkness preceding the end of the present world to social criticism surpassed only by the reign of quantity and the signs of the times his magnum opus in the present work gu non ruthlessly exposes the western deviation its loss of tradition its exaltation of action over knowledge its rampant individualism and general social chaos his response to these conditions was not activist however but purely intellectual envisioning the coming together of western intellectual leaders capable under favorable circumstances of returning the west to its traditional roots most likely via the catholic church or under less favorable ones of at least preserving the seeds of tradition for the time to come

the german empire before 1914 had the fastest growing economy in europe and was the strongest military power in the world yet it appeared from a reading of many contemporaries accounts to be lagging behind other nation states and to be losing the race to divide up the rest of the globe this book is an ambitious re assessment of how wilhelmine germans conceived of themselves and the german empire s place in the world in the lead up to the first world war mark hewitson re examines the varying forms of national identification allegiance and politics following the creation and consolidation of a german nation state in light of contemporary debates about modernity race industrialization colonialism and military power despite the new claims being made for the importance of empire to germany s development he reveals that the majority of transnational networks and contemporaries interactions and horizons remained intra european or transatlantic

rather than truly global
