the overall aim of this thesis is to analyze how municipalities support small and medium sized enterprises smes in their work to improve their energy efficiency the purpose of this study is to increase the current understanding of how the methods and tools used by municipalities to assist smes in improving their energy efficiency influence the end results in terms of achieved energy efficiency and how knowledge related to energy efficiency is created within smes this thesis consists of two separate case studies that examine how two municipalities used a network approach to support smes in implementing energy efficient measures the theoretical frameworks of policy networks barriers communities of practice cops and energy efficiency networks were used in this thesis the findings are presented in the appended four articles an overall conclusion is that networks that provide information in the form of a report with technological solutions as the only output are less likely to reach the agreed upon goals to achieve a more successful result smes must be active in the process they must be allowed to create knowledge and understanding that they perceive as valuable and relevant for themselves another important result is that information is not automatically transformed by smes into knowledge in fact smes need a platform from which they can negotiate the received information and use it to create knowledge through practice and social interaction finally it was found that the type of technological solution is not insignificant the type of energy efficient measure to be implemented and its level of complexity affect how a municipality should support energy efficiency work among smes för att policyprogram och riktlinjer ska kunna utformas så att de leder till uppfyllandet av miljömål behöver kommuner samverkar med bland annat det lokala näringslivet en form av samverkan som har börjat användas av kommuner är nätverk där man för samman företag med olika experter som tillsammans med kommunala representanter arbetar med att införa energieffektiva lösningar i dessa företag syftet med denna avhandling är att studera hur kommuner har stöttat små och medelstora företag smf i deras arbete med att införa energieffektiva lösningar i sina verksamheter detta undersöks med hjälp av fallstudier av hur två olika kommuner har arbetat med att ge stöd till lokala smf dessa två fall beskriver två olika sätt som kommunerna har jobbat med detta fokus i avhandlingen har varit inte bara på hur kommunerna har valt att stödja smf utan också på hur smf skapar kunskap och tar till sig information dessutom undersöks vilka faktorer i form av så kallade barriärer som kan tänkas hindra smf från att införa energieffektiva lösningar i sina verksamheter för analys av den insamlade empirin så har olika teorier använts såsom policynätverk barriärer community of practice cop och energieffektiviseringsnätverk resultaten beskrivs mer utförligt i de bifogade artiklarna resultaten pekar på att nätverk där bara information i form av en rapport delges smf så är sannolikheten låg att målen kommer att uppfyllas detta beror på att smf inte automatiskt omvandlar delgiven information till användbar kunskap istället behöver kommuner skapa en plattform där smf får möjligheter att arbeta med den delgivna informationen på ett aktivt sätt i ett relevant sammanhang som de anser att de har nytta av på så sätt kan värdefull kunskap genereras

via praktiker och sociala sammanhang ett annat viktigt resultat är att typ av teknisk lösning och komplexitetsnivå inte är oviktiga utan dessa måste kommunerna ta hänsyn till när de skapar olika policyprogram som stöd till smf för att kunna uppnå energieffektiviseringsmål

corporate social responsibility csr the commitment of organizations to balance financial performance with contributions to the quality of life of their employees the local community and society at large is gaining worldwide value as a business tool and social effort the review of literature suggests that many studies have been undertaken globally to understand csr as a subject of management but there have been very few studies undertaken to understand the other dimension of csr which is beneficiary community aspect of csr especially in india here the authors make an attempt to understand the csr concept from both the dimensions of csr i e management and beneficiaries of csr community the authors try to understand the issues covered by the management and their implementing strategies in order to meet community needs also the authors try to study the requirements and satisfaction of the community in the area where the corporates implement csr this type of attempt is the first one in india to study the community awareness and ist knowledge about csr as well as the organisations working in the community the present study also tries to measure the impact of csr activities undertaken by the organizations in a way to have the sustainable development at village level in this context the present study plays a significant role in the field of research methodology the field of management as well as social science especially from the social work perspective to meet the study objectives both primary and secondary data were used the primary data was collected in karnataka india by selecting nine organisations three of each from govt private and multinational companies those were recognised as leaders in implementing csr activities to understand the impact of csr on community 450 community respondents were also interviewed with the help of structured questionnaire secondary data for the study was obtained from karmayog csr ratings of the 500 largest indian companies and other similar studies other available articles books companies annual reports and related publications were reviewed in the study
