casl the common algebraic specification language was designed by the members of cofi the common framework initiative for algebraic specification and development and is a general purpose language for practical use in software development for specifying both requirements and design casl is already regarded as a de facto standard and various sublanguages and extensions are available for specific tasks this book illustrates and discusses how to write casl specifications the authors first describe the origins aims and scope of cofi and review the main concepts of algebraic specification languages the main part of the book explains casl specifications with chapters on loose generated and free specifications partial functions sub and supersorts structuring specifications genericity and reusability architectural specifications and version control the final chapters deal with tool support and libraries and present a realistic case study involving the standard benchmark for comparing specification frameworks the book is aimed at software researchers and professionals and follows a tutorial style with highlighted points illustrative examples and a full specification and library index a separate complementary lncs volume contains the casl reference manual

discover the latest developments in ergonomics and human factors with the newest edition of this market leading reference in the newly revised fifth edition of handbook of human factors and ergonomics drs gavriel salvendy and waldemar karwowski deliver a comprehensive exploration of workplace environment design human machine interfaces and cutting edge research on the reduction of health and safety risks the editors have compiled practical material from an international team of leading experts in ergonomics and human factors that will benefit specialists in the area as well as safety engineers and human computer interaction specialists the handbook includes information culled from over 7500 sources and features brand new coverage in areas like artificial intelligence social media information technology and cybersecurity and data analytics numerous case studies demonstrate the real world application of the concepts and methods discussed within and showcase the extraordinary developments in the field since the publication of the fourth edition in 2012 readers will also benefit from the inclusion of a thorough introduction to the human factors function including the discipline of human factors and ergonomics and human systems design and integration an exploration of the fundamentals of human factors including sensation and perception selection and action control information processing and mental workload discussions of the design of equipment tasks jobs and environments including workplace design task analysis and design and training systems an in depth treatment of design for health safety and comfort including low back and upper extremity musculoskeletal disorders and the use of personal protective equipment perfect for ergonomics and human factors engineers at any level of their careers handbook of human factors and ergonomics will also earn a place in the libraries of design engineers applied psychologists human computer interaction specialists engineering and technology managers and safety professionals and industrial hygienists

this book is intended to introduce and familiarize design production quality and process engineers and their

managers to the importance and recent developments in concurrent engineering ce and design for manufacturing dfm of new products ce and dfm are becoming an important element of global competitiveness in terms of achieving high quality and low cost products the new product design and development life cycle has become the focus of many manufacturing companies as a road map to shortening new product introduction cycles and to achieving a quick ramp up of production volumes customer expectations have increased in demanding high quality functional and user friendly products there is little time to waste in solving manufacturing problems or in redesigning products for ease of manufacture since product life cycles have become very short because of technological breakthroughs or competitive pressures another important reason for the increased attention to dfm is that global products have developed into very opposing roles either they are commodities with very similar features capabilities and specifications or they are very focused on a market niche in the first case the manufacturers are competing on cost and quality and in the second they are in race for time to market dfm could be a very important competitive weapon in either case for lowering cost and increasing quality and for increasing production ramp up to mature volumes
