the palgrave handbook of magical realism in the twenty first century examines magical realism in literatures from around the globe featuring twenty seven essays written by leading scholars this anthology argues that literary expressions of magical realism proliferate globally in the twenty first century due to travel and migrations the shrinking of time and space and the growing encroachment of human life on nature in this global context magical realism addresses twenty first century politics aesthetics identity and social national formations where contact between and within cultures has exponentially increased altering how communities and nations imagine themselves this text assembles a group of critics throughout the world the americas europe africa asia the middle east and australia who employ multiple theoretical approaches to examine the different ways magical realism in literature has transitioned to a global practice thus signaling a new stage in the history and development of the genre

humans and animals are not the only creatures that migrate plants also do this book is a comprehensive and analytical account of the migration of an old world plant water hyacinth also known to botanists as eichhornia crassipes from the amazon basin and surrounding areas to africa through human agency from about 1800 to the present as an integrative work which benefits from methodologies and conceptual approaches drawn from limnology botany biology geography history ecology and other social sciences and humanities the book further explores the political economic and ecological consequences of the spread of water hyacinth from its native habitat

through European botanical gardens to African rivers, lakes, dams, and wetlands in part as a narrative of Western tinkering with African ecologies gone awry. The study has strong lessons for environmental historians and social scientists as well as contemporary foundations, aid workers, development experts, and African governments. Although it may appear to be a micro-history of a single plant, water hyacinth, it illuminates broader issues in the history of the modern environment in Africa and similar studies worldwide. This study is primarily rooted on the histories of colonialism, bioinvasion, environmental realities, and experiences in Africa. The highly visible pathways of hyacinths spread across international frontiers along watercourses and communication networks means that not only is this a trans-boundary environmental affair, but one which directly involves bilateral relations between African states.

overview of major global and regional environmental issues and development that shaped policy decisions and actions during the course of the year. Emerging challenges, new findings, presenting scientific progress made in the year that may assist society in recognizing and better understanding emerging environmental issues and help decision makers in designing adequate responses. Geo-indicators highlighting some of the key global and regional environmental issues and trends that have been identified in geo-reports.
