system as well as developments in Kenya's financial system which strongly relate to the functionality of CBK such as financial innovation, the evolution of financial markets and non-bank financial institutions in Kenya.

This book documents important milestones in the epic journey traversed by the Central Bank of Kenya over the last 50 years, putting into perspective the evolution of central banking globally and within the East African region and contemplating future prospects and challenges. The book is timely, mainly because the global financial landscape has shifted; central bankers have expanded their mandates beyond the singular focus on inflation and consider economic growth as their other important objective. Financial crises have continued to disrupt the functioning of financial institutions and markets, the most devastating episodes being the global financial crisis which broke out in 2008 and from which the global financial system has not fully recovered, and the unprecedented challenges posed by the global coronavirus pandemic. Bank regulation has moved from Basel I to Basel II and somehow migrated to Basel III, although some countries are still at the crossroads. The book originated from the wide-ranging discussions on central banking from a symposium to celebrate the 50-year anniversary on 13 September 2016 in Nairobi. The participants at the symposium included current and former central bank governors from Kenya and the Eastern Africa region, high-level officials from multilateral financial institutions, policy makers, bank executives, civil society actors, researchers, and students. The book is an invaluable resource for policy makers, practitioners, and researchers on how monetary policy and financial practices in vogue today in Kenya have evolved through time and worked very well but also about some pitfalls.
