would you like to learn how to use python to generate machine learning models but you think it would be too difficult or perhaps you want to automate simple things with your computer but you don t know how to do it here s the deal as a beginner you might think that programming is complex learning artificial intelligence coding can take months and the possibility to give up before mastering it could be high so if you have a project to develop you could think on hiring a professional developer to shorten the time this may seem like a good solution but it is certainly very expensive and if the developer you chose doesn t perform a proper job you still have to pay for it the best solution is to follow a complete programming manual with hands on projects and practical exercises

computer programming academy structured this guide as a course with seven chapters for seven days and studied special exercises for each section to apply what you have learned step by step this protocol tested on both total beginners and people who were already familiar with coding takes advantage of the principle of diving concentrating learning in one week the result of this method has been one for both categories of students the content of the course was learned faster and remembered longer respect the average inside this book you will go through a first section in which fundamental and basic notions of deep learning are discussed to get to the next chapters crafted specifically to help you learn advanced coding concepts required to develop training data sets for the production of successful machine learning models in the detail you will learn why python is considered the fundamental tool for machine learning deep understanding of the significance of machine learning in our daily lives and why you cannot ignored its importance in 2020 12 machine learning models that you must study as a beginner the most common mistakes to avoid when you start building machine learning models with python step by step instructions to install required packages to set up a machine learning coding environment the algorithms that will make your life easier while coding artificial intelligence a proven strategy to process raw data to generate high quality training data sets a simple method to build the desired machine learning model in less than 7 days the 2 main libraries you need implementing to develop a neural network exercises and quizzes at the end of every chapter to review immediately what you ve learned extra content that you will appreciate as curious technology enthusiast why is this book different most of the books on the market only take a brief look into machine learning showing some of the topics but never going deep concretely the best way to learn machine learning with python is by doing and with this manual you will work through applicable projects in order to solidify your knowledge and obtain a huge sense of achievement this is what this guide offers to you even if you re completely new to programming in 2020 or you are just looking to widen your skills as programmer would you like to know more scroll up to the top of the page and select the buy now button the key to become a
