Question Answer What are the main features of perfect competition as explained by V.K. Sinha in 'English'? V.K. Sinha describes perfect competition as a market structure characterized by a large number of small firms, homogeneous products, free entry and exit, perfect knowledge among buyers and sellers, and absence of government intervention, leading to price takers in the market. How does V.K. Sinha explain the concept of price elasticity of demand in perfect competition? V.K. Sinha explains that in perfect competition, demand is perfectly elastic, meaning that any change in price leads to an infinite change in quantity demanded, because consumers can switch to other sellers instantly due to identical products. According to V.K. Sinha, what is the role of profit in a perfectly competitive market? V.K. Sinha states that in perfect competition, firms earn normal profit in the long run, as economic profits attract new entrants, increasing supply and driving down prices until only normal profit remains. What does V.K. Sinha say about the demand curve faced by individual firms in perfect competition? V.K. Sinha explains that the demand curve for an individual firm in perfect competition is perfectly elastic, coinciding with the market price, meaning firms can sell any quantity at that price but nothing at a higher price. How does V.K. Sinha differentiate between short-run and long-run equilibrium in perfect competition? V.K. Sinha highlights that in the short run, firms may earn supernormal profits or incur losses, but in the long run, entry and exit of firms lead to normal profits, establishing a stable equilibrium where price equals minimum average cost. According to V.K. Sinha, what assumptions underpin the model of perfect competition? V.K. Sinha notes that the model assumes a large number of buyers and sellers, homogeneous products, free entry and exit, perfect knowledge, and no government intervention or externalities. 5 What are some limitations of the perfect competition model discussed by V.K. Sinha? V.K. Sinha acknowledges that perfect competition is an idealized model with limitations such as unrealistic assumptions about identical products, perfect knowledge, and absence of market power, which rarely exist in real markets.
